

Ship Owner:

Upgrade your fleet with EZ-Path® Cable Transits

Avoid Hot Work

Transit devices can be screw-attached (or welded)

Be Proactive

Prepare for tomorrow's technologies & demands

Cable Safe

Round edges that won't damage your cables

Maintenance Free

No inspection required for addition or removal of cables

EZ-Path® is the solution for your cable management, cable protection and fire protection.

- EZ-Path® Cable Transits designed for easy cable changes
- The intumescent pads are covered with a smooth film that prevents friction with the cables
- Installation of cables does not require any hot work, mechanical fixing, or replacement of blocks, foam or sealant - addition or removal of cables will not generate dust, smoke or noise, helping to maintain a safe and clean environment
- Once installed, EZ-Path® remains compliant at all times, anyone can make cable changes without the need for a surveyor to come on board to reinspect cable transits
- Cables can be segregated by type or application
- You not only need to accommodate more cables to keep up with rapid advancements in technology, but also more frequent cable changes - EZ-Path® is THE solution!
- EZ-Path® Cable Transits remove all hidden costs and is always compliant

Don't compromise your fleet, upgrade it with EZ-Path® Cable Transits
