GENERAL NOTES:

1. Refer to section 07 84 00 of the specifications. For Quality Control requirements, refer to the Quality Control portion of the specification.

2. Details shown are typical details. If field conditions do not match requirements of typical details, approved alternate details shall be utilized. Field conditions and dimensions need to be verified for compliance with the details, including but not limited to the following:
   - Type and thickness of fire-rated construction. The minimum assembly rating of the firestop assembly shall meet or exceed the highest rating of the adjacent construction.

3. If alternate details matching the field conditions are not available, manufacturer's engineering judgment drawings are acceptable. Engineering Judgments shall follow the International Firestop Council (IFC) Guidelines for Evaluating Firestop Systems Engineering Judgments.

4. References:
   - UL Fire Resistance Directory; Current Edition
   - All governing local and regional building codes

5. Firestop System installation must meet requirements of ASTM E-814 (UL 1479) tested assemblies that provide a fire rate equal to that of the surrounding construction.

PROJECT NAME: 

ARCHITECT/CONSULTANT: 

TITLE: 

STI FIRESTOP SYSTEMS

DIVISION 22: Plumbing

DIVISION 23: HVAC

Specified Technologies Inc. 210 Evans Way Somerville, NJ 08876
