PRODUCT DATA SHEET

EZ-Path® RETROFIT DEVICE (EZDR200 & EZDR400)  Patent Pending

■ PRODUCT DESCRIPTION

The EZ-Path® Retrofit Device is designed to restore the ratings for overfilled cable sleeve penetrations. The device features a built-in fire and smoke sealing system that can attach either to the sleeve or the barrier surface.

The EZ-Path® Retrofit Device consists of a heavy gauge galvanized steel housing containing intumescent materials that expand rapidly when exposed to fire or high temperatures to close off the void area. Its unique two-piece design quickly installs around cable bundles and extended sleeves and can even accommodate standard conduit bushings. The square device shape allows cable exit or entry from multiple directions.

■ APPLICATIONS

EZ-Path® Retrofit Device restores non-compliant overfilled sleeve conditions in walls and floors. Cable capacity ranges from 50 to 100% visual fill. The two-piece split device facilitates installation around existing cable bundles. The steel backplate attaches directly to the end of the steel sleeve. For flush-mounted sleeves, mounting tabs allow for attachment to the substrate.

EZ-Path® Retrofit Devices are sized for 2" (2.197" to 2.375" or 56mm to 60mm OD) and 4" (4.500" or 114 mm) trade size EMT or rigid steel conduit sleeves or stubs. No additional putty or sealant is required. Existing putty or sealant may be left in place.

EZ-Path® Retrofit Devices are UL Certified in accordance with ASTM E814 (UL 1479 and CAN/ULC-S115). Systems are available for common floor and wall construction with ratings up to and including 2 Hr. L Ratings range from <1 to 10.7 CFM dependent upon cable types, sizes, and configurations. Refer to UL System for more details.

■ FEATURES & BENEFITS

- Easy to install.
- No Additional firestopping required.
- Sized for 2" (2.197" to 2.375" or 56mm to 60mm OD) and 4" (4.500" or 114 mm) trade size EMT or rigid steel conduit sleeves or stubs
- 50%-100% cable fill
- Works with extended or flush sleeves
- Bring overfilled sleeves back into code compliance!

■ PERFORMANCE

EZ-Path® Retrofit Device is UL Certified in accordance with ASTM E814 (UL 1479 and CAN/ULC-S115). Systems are available for common floor and wall construction with ratings up to including 2 Hr. L Ratings range from <1 to 10.7 CFM dependent upon cable types, sizes, and configurations. Refer to UL System for more details.

■ SPECIFICATIONS

All new data comm cable penetrations shall be routed through factory-supplied, maintenance-free, fire-rated pathway devices (Ex. EZ-Path® Fire Rated Pathways). For existing sleeves where cable fill percentage exceeds listed system specifications, a factory-supplied, fire-rated retrofit device shall be installed. The device shall be a two-piece split design with intumescent materials and allow 50 to 100 percent visual fill. The device shall be UL Certified and tested to ASTM E814 (UL1479) and CAN/ULC-S115. The device shall be EZ-Path® Retrofit Device.

Specified Divisions
Div. 7 07 84 00 Penetration Firestopping
Div. 26 26 00 00 Electrical
Div. 27 27 00 00 Communications

■ MAINTENANCE

No maintenance of the device is normally required.

■ TECHNICAL SERVICE

Technical information including Product Data Sheets, Installation Instructions, applicable UL Classified Systems, Certificates of Conformance, and suggested specifications are available at the company’s website (www.stifirestop.com). For all other information, contact the manufacturer directly by dialing (800) 992-1180.

■ PRECAUTIONARY INFORMATION

The use of this device is subject to local, regional and national codes. Consult the local Building Code Official or Authority Having Jurisdiction regarding any regional or local requirements that might influence the selection or use of the product.
**INSTALLATION INSTRUCTIONS**

### What is Included
![Diagram of EZ-Path® Retrofit Device](image)

**Sleeve Installation**

![Diagram of Sleeve Installation](image)

**Wall Installation**

![Diagram of Wall Installation](image)

The EZ-Path® Retrofit Device is designed to bring overfilled cable sleeve penetrations into code compliance. The device features a built-in fire and smoke sealing system that installs over the end of conduit sleeves and stubs restoring deficient fire and smoke seals without the need for additional firestopping products. See included installation instruction for more detail.

Note: Cables are deliberately not shown in any of the images to clarify device installation. However, a visual cable loading of 50 to 100% is required. For cable types and sizes, refer to applicable UL Certified Systems. For fastener types, consult the latest UL® fire resistance directory for permissible types and sizes.

### AVAILABILITY

EZ-Path® Products are available from designated authorized STI distributors. Consult the factory or visit the website (www.stifirestop.com) for the names and locations of the nearest representative or distributors.
