INSTALLATION INSTRUCTIONS

SpecSeal® Ready Sleeve

New Work Installations

1. Create round opening in assembly.
2. Place sleeve in opening.
3. Install 1 flange and gasket onto sleeve.
4. With escutcheon plates held tightly against wall, tighten screws. Repeat process on other side of wall.
5. After cabling is installed, install SpecSeal® Putty into sleeve on each side of assembly, flush with ends of steel sleeve. See appropriate UL System for more detail.
